MEMORANDUM FOR: Director of Joint Computer Support

SUBJECT   : Partitioned Access to the OC Personnel Data
                  Base (COMCON)

1. The manpower control system data base, including
COMCON, contains information on all communications personnel.
Our managers require access only to the information concerning
the personnel for whom they are responsible. This would
generally be at the major OC organizational component level
(Engineering, Operations, Services, etc.) and again at the sub-
career panel level (technicians, engineers, telecommunications
specialists, etc.). We have determined the OC personnel who
will have access to the COMCON/HRSMCS data base and the por-
tions of the data base to which they will require access.
We would like to have security locks established to partition
the data base in a manner which will allow access to informa-
tion required by appropriate personnel and which will deny
STATINTL access to all other information.

2. This requirement has been discussed briefly with
[   ] of your staff. In this discussion, it was
agreed that these additional security locks could be pro-
grammed and it was recognized that this was a new requirement
which would have to be levied upon OJCS. It is requested that
STATINTL a study be undertaken to determine the cost and time needed to
satisfy this requirement and that we be advised of the results.
Further information and assistance can be obtained through
[   ] OC ADP Systems Administrator on exten-
